Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

- D: GB 992 076 A (DEUTSCHE EDELSTAHLWERKE AG) 12 May 1965 (1965-05-12).
- 1.1 The document D discloses (the references in parentheses applying to this document):

a container (21) comprising a container liner made of a fluidising mat, which comprises an upper, gas permeable sheet (1) and a lower gas impermeable sheet (11) (cf page 2 lines 78-80), the upper and lower sheets (1, 11) being maintained in spaced apart superimposed relationship by a plurality of spaced-apart load bearing means (2), which define a plurality of passageways that extend in different directions over substantially the full area of the fluidising mat and intersect with each other to form a single continuous chamber between the upper and lower sheets (1,11).

The subject-matter of claims 1, 22 and 25 lacks therefore novelty (Article 33(2) PCT).

- 1.2 The technical features of claims 2-4, 6-10, 15, 17-19, 23 and 24 being also known from the document D, the subject-matter of these claims is also not novel (Article 33(2) PCT).
- 2. Claims 5, 16, 20 and 21 disclose well-known alternatives or options of fluidising mats and cannot be therefore considered as involving an inventive step (Article 33(3) PCT).
- 3. Claims 11-14 seem to meet the requirements of the PCT with respect to novelty and inventive step (Article 33(2),(3) PCT).
